Personal Statement

Regular weekly presentations of project progress and skills at University has lead to the development of high level communication and presentation techniques, as well as the development of a good commercial awareness. An individual who is pleasant and enthusiastic about a challenge, and able to converse on all levels with very good organisation, attention to detail and problem solving skills.

- Proficient in I.T including the use of both Windows and Mac operating systems, including Microsoft Office Word, PowerPoint and Excel.
- Articulate with a good telephone manner.
- A fast learning reliable approachable individual who is creative and productive, who works well as part of a team, or individually.
- A non-smoker, with a clean Full UK driving licence and own transport.

Work History

Imagination Design Project - May 2009: I had the opportunity to take part in a project at the end of my first year at University, with the Imagination design company in London, receiving impressive feedback on the design work I produced. I enjoyed the challenge and the highly driven working environment, and presenting and communicating the design to the client at the end, with impressive feedback.

BRIK Composites Group - March 2010: I completed a design project for BRIK Composites; a company which designs and manufactures products made from fabricating LG HI-Macs (an acrylic composite material). I particularly enjoyed developing my design outcome with use of CAD and physical 3D models, and presenting the solution to the client. I was very satisfied with the feedback given, and the client's response to this project.

Major Design Project January-May 2011 - I have completed a luxury high end Yacht design proposal for use on the 'Fairline Squadron 78' motor yacht. I created concepts for three of the spaces including the master bedroom with en-suite, and saloon entertaining area. The use of lighting design was a key part of this project, with LED glass panel engraved lighting, as well as mood and crystal lighting concepts used in the design.

The Old Crown Coaching Inn, Faringdon. May-September 2009: Barmaid & Waitress. Duties involved: Handling money, use of the till system, providing a bar and waitress service.

Skills gained: Working as a team, development of customer service skills.

UKAEA Harwell. June-July 2007: Administrative Assistant to Onsite Photographer. Duties involved: Data entry, report writing, arranging and storing media and filing.

Laboratory Assistant in the afternoons.

Duties involved: assisting in experiments, recording data, collating and checking documents, interviewing staff to establish whether QA documentation was complete, and setting up and storing equipment.

Skills gained: Prioritising and planning work effectively, punctually and efficiently, improved organisational skills.

Education

The University of Northampton 2008-2011: Interior Design BA (hons) 2:1

Faringdon Community College 2001-2008:

GCE A-Levels; including Product Design, History, General Studies

AS level in Art.

GCSEs; including English, English Literature, Maths, Science Double Award, Graphic Design, Art, History, French, Philosophy and Ethics.

Hobbies and Interests

I have played the violin and piano from a very young age and taken part in youth orchestras, as well as performing violin solos to the local community at young musicians' evenings.

I enjoy regular exercise, including walking, swimming and dancing.

In my spare time I enjoy reading books and magazines to keep up to date with current design trends.

Cooking and socialising.

Fashion and horse riding.
